## Data Sheet of Bag Lifting Instant Top Discharge Full Body Opening Centrifuge

| Model                  | 60"                | 48"                | 36"                | 24"               |
|------------------------|--------------------|--------------------|--------------------|-------------------|
| Basket dia             | 1500               | 1200               | 900                | 600               |
| Basket depth           | 600                | 500                | 450                | 300               |
| Working Cap. under lip | 580                | 300                | 185                | 62                |
| Basket load max (kg)   | 667                | 376                | 252                | 78                |
| Max basket revolutions | 850                | 950                | 1050               | 1250              |
| Centrifugal force      | 545                | 550                | 520                | 485               |
| Filteration area       | 2.43               | 1.98               | 1.32               | 0.49              |
| Overall dimensions     | 2450 X 2000 X 3200 | 2100 X 1650 X 2650 | 1820 X 1250 X 2300 | 1300 X 950 X 1750 |
| Weight                 | 4500               | 3600               | 2200               | 1500              |
| Motor hp               | 25                 | 15                 | 7.5                | 3                 |

### Notes :

- ◆ Centrifuges can be manufacture in different sizes on demand.
- ◆ Values mentioned in chart are approx & may vary machine to machine.
- ◆ Basket load will vary based on Bulk density of material.
